

# Middle School Science Teachers Needed for Educational Software Online Survey

The Life Underground Game is an interactive outreach experience for 7th and 8th grade classrooms.

The goal is for students to visualize microscopic life at a range of terrestrial and extraterrestrial subsurface conditions. Students take the role of a young student investigating extreme subsurface environments for microbial life.

## Study tasks:

Spend an hour or so exploring the specified educational software and review accompanying supplemental materials

Complete a 30-minute online survey

## Compensation:

\$25 Amazon.com gift card

## Benefits to Participation:

Help improve educational materials  
Learn about new software available for your classroom.

Free to use in your own classroom and share with students!

Please complete our brief interest survey:
